Final Project

Blair Morton
Dreamweaver

- Dreamweaver is a really interesting site, and the concept of making my own website is cool, but....

HOW THE HECK DO I USE THIS?!?!
How I felt About Dreamweaver
Seriously Though….

- Dreamweaver kept telling me there was an error
- I watched the videos, asked friends, read through all my notes, I even emailed Professor Julovich
- Finally, I decided to take my frustration to Wells
The struggle with Dreamweaver continues at Wells

- Wells actually turned into Spea, where I ran into even more people from this class.
- First time I tried to open Dreamweaver in spea, it worked.
- For the life of my I could not get the assignments site up and running, but I got the other one up fairly quickly.
You told me I needed a chart, so here it is

<table>
<thead>
<tr>
<th>Description</th>
<th>Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Times I felt like giving up</td>
<td>16</td>
</tr>
<tr>
<td>Times I wondered why I couldn’t get this the first time</td>
<td>5</td>
</tr>
<tr>
<td>Times I used this classes knowledge outside of class</td>
<td>32</td>
</tr>
<tr>
<td>Times I was glad I kept notes in this class</td>
<td>46879</td>
</tr>
</tbody>
</table>
Where My Time Went

Time (In Hours)

- Excel: 14 hours
- Access: 3.5 hours
- Dreamweaver: 2 hours
- Powerpoint: 1.5 hours
Items fixed

Excel
- Spelling Errors
- Forgotten parts
- Wrong answer
  - Negative

Access
- Forgotten parts
- Misnamed items
- Page layout
- Placement of items

Word
- N/A
Benefits

• I now have my own website!
• I have a basic understanding of the web and its tools
• I grew as a person…
  • I learned patience
What I would have done differently

- Meet with Professor Julovich
- Fix the homework sooner than I did
- Not broken my computer
- Gone to a campus computer sooner than I did
Final Thoughts

• This class was challenging but I’m glad it was a requirement.
• I learned a bunch that I’m already using in other classes.
• I’m praying that I never have to use Dreamweaver ever again!
