Purpose and Scope

This policy applies to anyone who is using a GOAL computer. The purpose of this policy is to ensure that all patrons are using the computers properly and are not engaging in illegal or immoral activities. All parties affected by this policy will be made aware of it when they sign into their computer. A window containing the privacy policy will pop up and they will have to agree to it to access the computer further. If they breach the privacy policy they agreed to, they can be removed from GOAL and the authorities may be contacted if necessary.
