1. Which articles did you choose?
   1. Is it OK to Let Apps Make you a Better Person
   2. Laws and Ethics Can’t Keep Pace with Technology

2. What is a general summary of the articles? (2-3 full paragraphs EACH)

Is it OK to Let Apps Make You a Better Person

In the article it starts to talk about how technology has changed many things in the past. Some of these things include whips, speed bumps, alarm clocks and many more are things that have came from technology. It then goes on to talk about how the times have changed and no matter what time you are from technology has affected it in some way.

The article then goes in to detail about how technology is changing people. It talks about how there are some apps that are meant to help people become more healthy by having them track their daily activities. It also talks about how there are apps that will review your emails so that they are not to mean and appropriate for work. Apps are changing the way that people live and how society is changing.

Laws and Ethics Can’t Keep Pace with Technology

Many things are changing with technology and they are changing fast. One thing that can not keep up with the changes in technology. The first thing is that things are being done faster and cheaper. This is always a good thing in an emerging market and will help the world advance. A lot of things are happening that many people wouldn’t think would happen.

One thing that is happening that no one expected is that there is a company that can tell you your genetics. 23andme is a company that people send in some DNA and they send back the result of where are genetics are from. The thing is that is not the only thing they do. They also send back what diseases that you might get. The thing is that this is not accurate and is semi unlawful at the same time because the people who are suppose to be telling you that information are doctors and people who are certified.

3. How did you think about technology and ethics BEFORE these articles? (1-2 full paragraphs)

I thought that technology just had a little part in our world. I thought it was just something that made it easier to do everyday task. I thought that its main purpose was to connect people so that they can interact more. I seemed to me as something just used to have different options to do certain things.

4. How did you think about technology and ethics AFTER reading these articles? (1-2 full paragraphs)

I have noticed that technology is a lot more then that. It is used to make things faster and cheaper. It also can be used to tell people where they are from. Many people rely
on technology to start their day and to get their breakfast ready. Technology has gone a long way from where it started and it is going to keep moving forward.

5. What is the one major takeaway that you have after reading these articles? (1 full paragraph)

One major takeaway is that you should never trust everything on the internet. Anyone and everyone can post whatever they want. Many things on the internet can be very helpful so we should take advantage of it. It is a very helpful resources and is something that should not be taken for granted.

6. What questions do you have about technology and ethics? (at least 3 questions)

When will the internet get 100% regulated?

Will there ever be a time that everyone follows the ethics of technology?

When will technology 100% take over and make it so people never meet in person for meetings/class?
