Errata to
Stationary Measures for Random Walks in a Random Environment with Random Scenery

by Russell Lyons and Oded Schramm

At the end of Example 1, product measure should be biased by the maximum of 1 and the degree of $o$ in $\omega$; otherwise it is not an equivalent measure.

After Theorem 3, the sentence should be “Note that this incorporates Theorem 2 because when $\Gamma$ is unimodular, the function $(\xi, x) \mapsto m(x)^{-1} \nu_\xi(x)$ is $\Gamma$-invariant.”
